

S-100 and eNavigation

Julia Powell

S-100 Working Group Chair

What is S-100?

*Provides the **data framework** for the development of the next generation Electronic Navigational Charting products, as well as other digital products required by the hydrographic, maritime and GIS communities*

A brief timeline...

Who is using S-100

- ✦ International Hydrographic Organization
 - Electronic Navigational Charts
 - Nautical Publications
 - Surface Currents
 - Bathymetry
- ✦ IALA
 - AIS
 - VTS
 - ATONs
- ✦ WMO
 - Ice
 - Ocean Forecasts
- ✦ IMO
 - E-navigation

S-100 can support :

- ✦ Imagery and gridded data
- ✦ High-density bathymetry
- ✦ Dynamic ECDIS
- ✦ Underkeel Clearance Management
- ✦ Surface Currents
- ✦ Marine GIS
- ✦ Web-based services
- ✦ other maritime data applications ...

What is S-100?

- ✦ Broad geospatial data framework
 - Based off ISO GIS standards
- ✦ Not specific to ECDIS or charting
- ✦ Create different **product specifications** to meet specific requirements
 - ✦ Machine Readable Catalogues
- ✦ Designed for Data Interoperability
- ✦ Harmonized Data Model

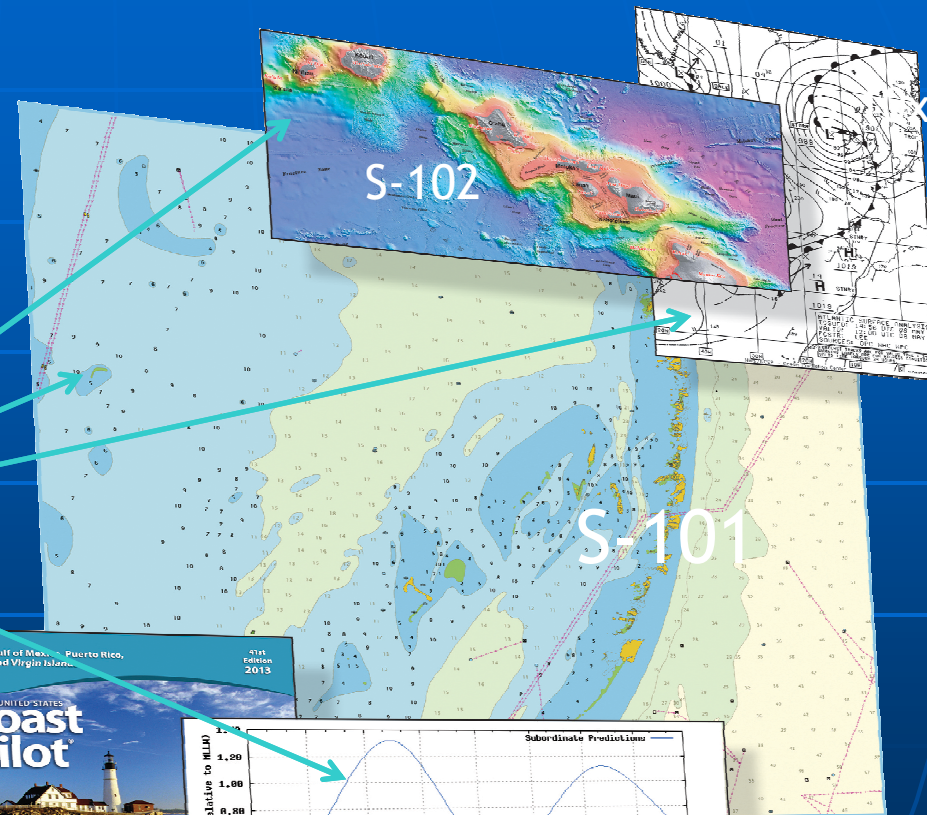

Harmonized Data Model

S-100 and Product Specifications

... contains all the components to make different product specifications for all types of hydrographic data

S-101

- ✦ S-101 represents a major step forward in product specifications for Electronic Navigational Charts
- ✦ Based on S-100 – the Universal Hydrographic Data Model
- ✦ Will eventually replace S-57 (in the future)
 - Utilize a convertor from S-57 to S-101 to allow HO's time to upgrade their production systems

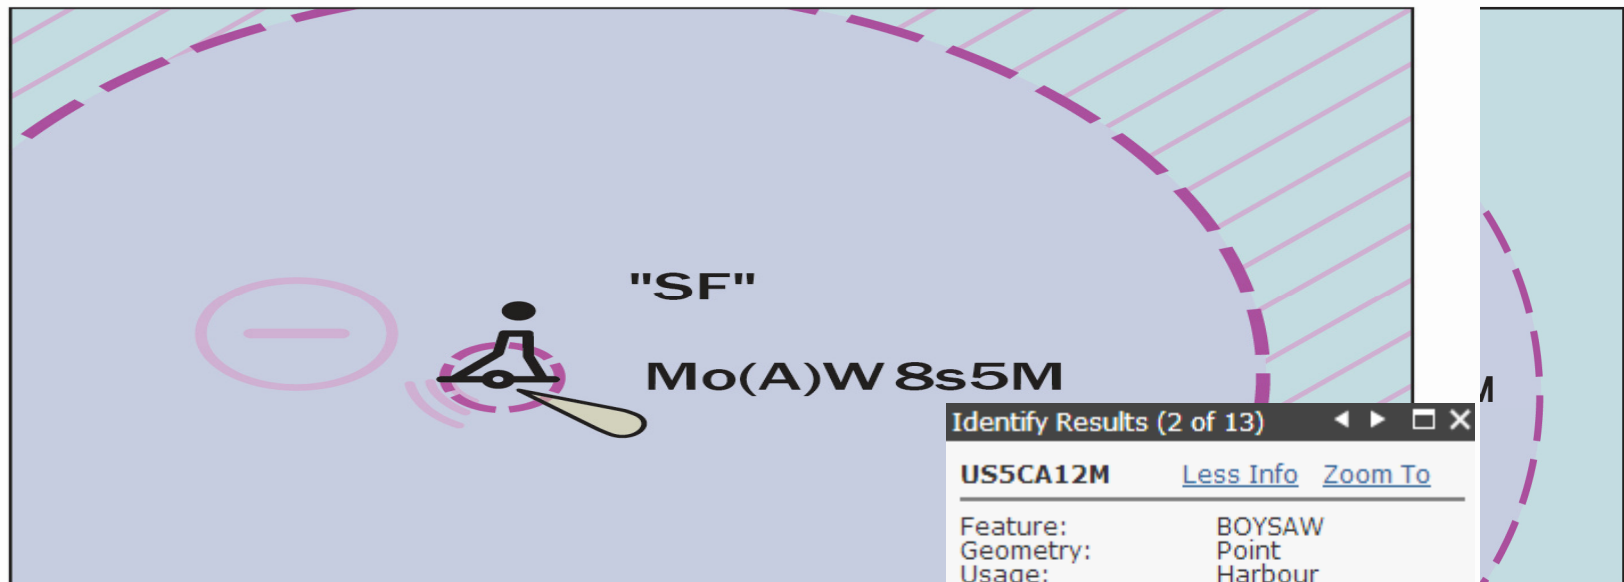

S-101 New Functionality

- ✦ Revised the concept of usage bands
 - ONLY for CATALOG purposes
- ✦ ENC data tied to display scales
 - Maximum Display Scale
 - Minimum Display Scale

Display Scale
1:10,000,000
1:3,500,000
1:1,500,000
1:700,000
1:350,000
1:180,000
1:90,000
1:45,000
1:22,000
1:12,000
1:8,000
1:4,000
1:3,000
1:2,000
1:1,000

S-101 Text Placement

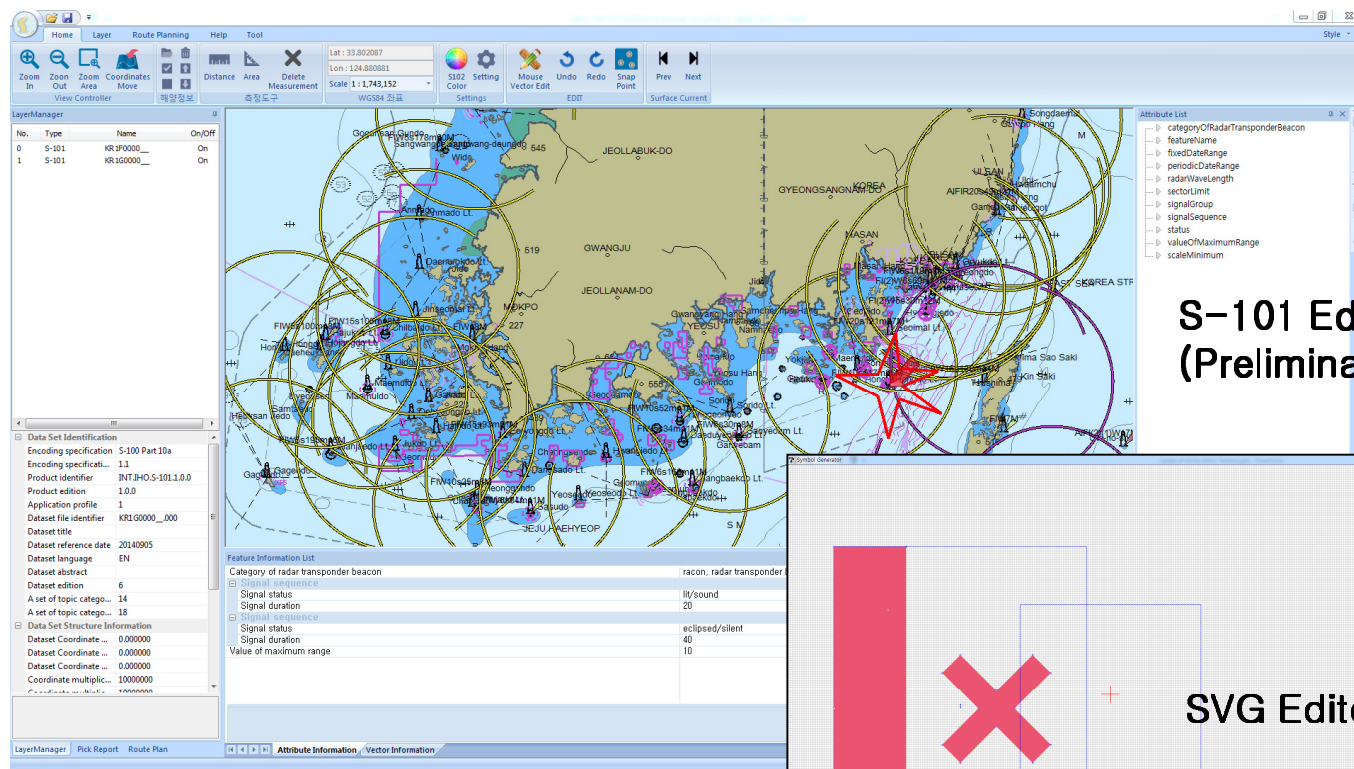

S-100/S-101 Test bed

- ✦ IHO is establishing an S-100 test bed
 - Test the functionality of S-100 Product Specifications
- ✦ Phased approach
 - Multiple sub-systems
 - Iterative Development
 - Nine Distinct Phases

S-100 Interoperability Specification

- ✦ Long and diverse list of requirements ~70
- ✦ Provide support for complex data loading scenarios
 - Data Interleaving
 - Partial Data Suppression
 - Data Replacement
 - Partial Data Replacements
 - Data Overlays
- ✦ Facilitate easy loading of predefined product combinations

S-100 Interoperability Analysis - Requirements

- ✦ Address Potential Data Clashes
 - Duplicate Feature Instances
 - Duplicate Feature Domains
 - Combined Geometry
 - Spatial Discrepancies
- ✦ Facilitate Skin-Of-The Earth Replacement
- ✦ Provide support for comprehensive hierarchy of data and display priorities

S-100 Interoperability Analysis

- ✦ Support Harmonized Portrayal
 - Display of Significant Features
 - Avoid Obscuring Overlay
 - Colour Set-Asides
 - Day / Night / Dusk Modes
 - Portrayal of Data Quality for Combinations of Information Layers
 - Display of Text

ECDIS - Today
