Introduction

The aim of IALA is to foster the safe, economic and efficient movement of vessels, through improvement and harmonisation of aids to navigation worldwide and other appropriate means, for the benefit of the maritime community and the protection of the environment.

IALA has been located in France since its creation in 1957 and is established under French national law – the Law of Associations of 1901. This law requires that IALA operate in accordance with its Constitution, which must be registered with the French Authorities. The Association is also subject to other French domestic laws that are relevant to its operations, including those related to employment, taxation, health and safety, and customs and immigration (including working visas).
