

**IALA COUNCIL**  
**77th session**

**28 May 2023**  
**Rio de Janeiro**  
**Brazil**

**10 – TECHNICAL ACTIVITIES**

***10.1 – Committee report***

**10.1.1 – ENAV EM1(31) summary report**

Note by the Secretariat

**1. INTRODUCTION**

Unlike other committees, the 30th session of ENAV last year decided to hold an extraordinary meeting to maintain momentum on several relevant matters within the scope of ENAV. Consequently, the ENAV Extraordinary Meeting (EM) 1, which is the 31st session of the Committee, was held from January 30th to February 9th, 2023, as a blended-type meeting.

The meeting was chaired by Hideki Noguchi, vice-chaired by Jorge Arroyo, and the Secretary for the meeting was Jaime Alvarez. There were 84 registered participants, including 13 first-time attendees, from 22 countries and 4 organizations. The Committee considered 22 input papers and produced 4 output papers.

On the last day of the meeting, the committee suggested renaming itself from e-Navigation Information Services and Communications (ENAV) to Digital Technologies (DTEC) in order to address a broader range of emerging technologies, including autonomous systems, cybersecurity, and others.

This is in good line with the idea and renaming of the e-Navigation Underway series of conferences to Digital@Sea conferences.

**2. OUTPUTS**

The committee did not prepare any publications for council approval but engaged in technical discussions. ENAV revised the New Technology Review Summary table and submitted it to the ENG Committee. The Committee also sent a liaison note to LAP, proposing a caveat for the Emerging Technologies - Candidate Technology Tracker table.

**3. IALA SUBMISSION TO OTHER ORGANISATIONS**

One liaison note to ITU (CPM and WRC23) was prepared and approved by the Council by correspondence.

- C77-12.2.2 (ENAV EM1(31)-12.3.3.1, ENAV EM1(31)-12.3.3.2) Draft IALA Position to CPM on WRC-23 Agenda item 10

**4. THE COUNCIL IS REQUESTED TO**

**NOTE** the information provided in this document.
